Amended	July 2023	ECTS Points	15

Aims of Module

To provide the student with the ability to understand and apply the fundamental, theoretical and practical principles, methods & processes relevant to Fashion & Textile Design.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Develop a breadth of core research skills as a foundation to apply the principles and processes relevant to specialist study.
- 2 Demonstrate a practical working knowledge of materials, processes and technologies specific to Fashion & Textile Design.
- 3 Use a range of 2D/3D multi-media visualisation processes and techniques to communicate design concepts.
- 4 Engage in the critical and conceptual exploration of ideas within workshop and studio practice.

Indicative Module Content

The module will introduce practical and theoretical aspects of Fashion & Textile Design which will typically include: Research methods. Problem solving. Introduction to design principles & processes, pattern cutting and fabric construction. Computer aided design and visualisation through a variety of processes. Oral and written communication and presentation. Creative and critical thinking methods. Projects working in partnership with other stage two modules encouraging integration. Emphasis is placed on the research and development stages of the projects with drawing and visualisation as an underpinning element throughout. Completed project work should evidence an awareness and consideration of sustainable themes in a manner appropriate to the context of the discipline.

Module Delivery

The module is studio and workshop based supported by lectures, crits and seminars. Projects are introduced and expanded upon using relevant background material, study visits to relevant organisations and professional practitioners and related published material and demonstrations.
