Aims of Module

To provide students with the ability to demonstrate critical, integrated and applied understanding of planning, execution, analysis and reporting of an independent nutrition-related piece of research.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Design a plan of work to collect and analyse data on a relevant topic.
- 2 Work independently to acquire and utilise the appropriate skills and knowledge base.
- 3 Consider and evaluate relevant literature to justify the need for research on a relevant topic.
- 4 Communicate and critically evaluate the methods and findings of the research using written communication skills.
- 5 Summarise and defend the research using oral communication skills.

Indicative Module Content

Research on a relevant topic, where the student must obtain, record, collate, analyse, interpret, present, report and critically evaluate nutrition-related data in a research project, using appropriate qualitative and/or quantitative methods. There is no formal syllabus for this module.

Module Delivery

This is a practical module devoted to research in a relevant field of study and may involve a wide range of techniques. The module is delivered by contact with an individual supervisor. There is provision for other staff to be involved in supervision in cases where this would provide expertise to supplement that of the supervisor.
