Created	April 2018	SCQF Level	SCQF 8
Approved	June 2018	SCQF Points	15
Amended	June 2018	ECTS Points	7.5

Aims of Module

To enable the student to understand the principles and theories associated with Omni-channel fashion with consideration for logistics processes and its importance to the industry.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Describe and outline the components of Omni-channel fashion networks from end to end i.e. from sourcing the items to delivery to the end consumer.
- 2 Convey information on business relationships, key partners and issues identified within the Omni-channel and supply chain processes.
- 3 Consider the role of logistics service providers in the fashion Omni-channel to serve the end consumer.
- 4 Discuss the impact future trends could have on the delivery of fashion items.

Indicative Module Content

Supply chain management definition - sourcing of products, supply chain channel, value chain, end to end consumer, flow of goods through multi-channels and the returns. Types of channel, lean and agile and necessity of each to deliver in the Omni-channel marketplace. Components of the Omni-channel - the logistics mix and the many ways in which a consumer can purchase. Suitable network for moving fashion products around, push or pulled stock leading to stock velocity, quick response, category management, product replenishment and efficient consumer response approaches. Supply chain processes and business relationships - who has the most control, power and interdependence. Time to market, time to serve and time to react. Purpose of logistics service providers in serving the end consumer. Future trends and their impact on the delivery of Omni-channel demand for fashion.

Module Delivery

Key concepts are developed and illustrated through lectures and directed reading. The understanding of students is further enhanced by use of relevant tutorials. Additionally, students will be directed to work independently.
