Approved	July 2019	SCQF Points	45
Amended	August 2021	ECTS Points	22.5

Aims of Module

To provide students with the opportunity to undertake supervised, independent research into a self-developed topic relevant to their degree subject, and to apply the full range of associated research skills required to produce a research thesis.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Identify a relevant and feasible area of research for the purpose of individual investigation.
- 2 Undertake a comprehensive literature review of the topic under investigation and write a comprehensive and logical evaluation of the salient aspects.
- 3 Design and implement an appropriate research methodology taking full account of the range of alternative techniques and approaches.
- 4 Plan and write a thesis which demonstrates both a detailed understanding of the selected topic and a logical consistency in approach.

Indicative Module Content

To provide students with an understanding of the planning and delivery of a selected academic research project. Students will develop appropriate professional skills as well as the ability to identify and utilise appropriate strategies and techniques for the purpose of individual investigation and research within a subject specific area aligned with their chosen degree route.

Module Delivery

Delivered over Semester 1 and Semester 2 as a supervised research based course within the subject discipline of the chosen degree route, supplemented with lectures and workshops.
