Aims of Module

To enable the student to undertake applied research and development at an advanced level, contributing substantially to the development of new techniques, ideas and approaches, by applying their subject knowledge and their knowledge of research methods to an independent investigation of a topic within the field of business and management.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Conceptualise, design and implement an approved research project in the chosen subject field.
- 2 Apply a range of research skills and methods to gather, analyse and critically evaluate literature, theories, data and evidence as appropriate to the agreed research topic in a relevant field.
- 3 Analyse and critically evaluate findings and conclusions in a piece of independent research that contributes to and advances the body of knowledge in their chosen specialist area.
- 4 Develop and apply, at an advanced level, the skills of written communication and presentation required to appropriately address relevant theory and concepts, and/or current debates.

Indicative Module Content

A research proposal on a relevant topic, normally developed in GSM010 and GSM011, will form the basis for development of the thesis. Students will work independently to undertake the research and prepare the thesis.

Module Delivery

Students are expected to take full responsibility for their own learning, and will receive guidance and support from their supervisory team, and others as appropriate.
