To promote an understanding of the contribution of quality and environmental management systems to the achievement of			

organisational effectiveness.

Assessment Plan

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

1. Critically assess the role and rationale behind quality and environmental management systems like ISO 9000 and ISO 14000 within organisations.
2. Critically evaluate the key requirements of ISO 9000 and ISO 14001 and be able to practice a range of advanced and specialised skills for the preparation of procedures and the completion of internal quality audits.
3. Evaluate the relationship between the establishment and maintenance of systems like ISO 9000, ISO 14001 and TQM and the achievement of improvement in organisations.

	Learning Outcomes Assessed
Component 1	1,2,3,4

Report which asks students to undertake an assessment of a quality management system, evaluate the relationship between a QMS and improvement and synthesise current operational and strategic issues in quality and environmental management systems.

Indicative Bibliography

1. HOYLE, D., 2018. *ISO 9000 quality systems handbook*. 7th ed. Abingdon: Routledge. *ebook*
2. DENTCH, M.P., 2016. *The ISO 14001:2015 Implementation Handbook*. Milwaukee: ASQ Quality Press

4.Synthesise the current operational and strategic issues in relation to quality, environmental and sustainable management systems; including proposed revisions and recent developments.

Indicative Module Content

The module will examine the following: the principles of quality management systems; quality assurance; quality control and quality improvement; quality system strategies; quality and environmental system requirements; implementing quality systems; the assessment process including first, second and third party assessments; beyond ISO 9000 and ISO 14000; TQM; integrated and single management systems; quality system developments and sustainability.
