Module Title

Business Analytics Project

Reference	CB3066	Version	3
Created	February 2024	SCQF Level	SCQF 9
Approved	October 2018	SCQF Points	30
Amended	April 2024	ECTS Points	15

Aims of Module

To provide the student with the opportunity to integrate knowledge and skills gained through the course to a self-selected project which links to an industry-based case study or consultancy requirement.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Develop a plan to achieve specified objectives in response to client needs.
- 2 Produce professional outputs that respond to client needs effectively.
- 3 Apply in a practical context, the knowledge, understanding and skills developed in the taught elements of the course.
- 4 Reflect critically on your existing learning skills and knowledge and how new professional skills should be acquired to maximise employability.

Indicative Module Content

This project is a major piece of self-study, requiring students to demonstrate their ability to understand, analyse, apply and evaluate relevant business analytics and digital marketing concepts and applications. Students will generate conclusions and practical outputs in response to a self-selected business problem. It is envisaged that the majority of projects tackled will be live client consultancy projects, however, purely conceptual pieces of work are also acceptable. This module engages students with UNESCO's Education for Sustainable Development competencies including the Integrated Problem Solving, Normative and Strategic competencies in terms of developing independent innovative actions, solving complex problems with frameworks and reflecting on the norms and values of actions.

Module Delivery

The module will be delivered via guided supervision, workshops, online resources and online exercises.
