

MODULE DESCRIPTOR

Module Title

Database Systems

Reference	CM1120	Version	1
Created	November 2023	SCQF Level	SCQF 7
Approved	July 2016	SCQF Points	15
Amended	August 2023	ECTS Points	7.5

Aims of Module

To provide an understanding of core relational database design principles and how these are applied to the development of a relational database management system.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Recognise appropriate relational database systems at the conceptual and logical levels.
- 2 Choose normalisation techniques to achieve more efficient relational database designs.
- 3 Set up SQL code to define and manipulate relational data, including CRUD (Create, Read, Update, Delete) operations.
- 4 Identify optimisation techniques in relevant situations within relational databases.

Indicative Module Content

The relational model: relations, keys, entity and referential integrity and constraints. Database design methods: Entity-Relationship modelling and normalisation techniques. SQL: data definition and manipulation languages. Database Performance: Denormalisation. Contextual Application: games, web, app, security and access control

Module Delivery

Key concepts are introduced and illustrated through lectures. The understanding of the student is tested and further enhanced through interactive sessions.

Indicative Student Workload

	Full Time	Part Time
Contact Hours	30	N/A
Non-Contact Hours	120	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
<i>Actual Placement hours for professional, statutory or regulatory body</i>		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type: Practical Exam Weighting: 100% Outcomes Assessed: 1, 2, 3, 4
 Description: A practical assessment consisting of database design and implementation.

MODULE PERFORMANCE DESCRIPTOR**Explanatory Text**

An overall minimum grade of D is required to pass the module.

Module Grade	Minimum Requirements to achieve Module Grade:
A	The student needs to achieve an A in C1.
B	The student needs to achieve a B in C1.
C	The student needs to achieve a C in C1.
D	The student needs to achieve a D in C1.
E	The student needs to achieve an E in C1.
F	The student needs to achieve an F in C1.
NS	Non-submission of work by published deadline or non-attendance for examination

Module Requirements

Prerequisites for Module None except for course entry requirements.
 Corequisites for module None.
 Precluded Modules None.
