Aims of Module

To provide the student with an opportunity to apply the knowledge and understanding of technical aspects and skills acquired on the course, in a real world work environment.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Demonstrate a variety of skills including: technical and learning skills.
- 2 Develop practical skills as appropriate to their role in the host organisation.
- 3 Identify, evaluate, select and apply the theories, models, concepts and principles acquired on the course, in a real world work environment.
- 4 Critically review their own technical strengths and weaknesses at work and identify skills development needs.

Indicative Module Content

The content of the Network Industrial Placement (Level 4) module will be a continuation of the Network Management Work Placement (Level 3) module. Each student will review the agreed learning contract with the host organisation and carry out a programme which will enable the Learning Outcomes specified to be achieved.

Module Delivery

Supervised placement within a company by means of on-the-job training. In addition, students may be required to attend specific staff development workshops as designated by the host organisation. Students will be assigned an academic tutor.
