## This Version is No Longer Current

The latest version of this module is available here

| MODULE DESCRIPTOR |  |  |  |
| :--- | :--- | :--- | :--- |
| Module Title |  |  |  |
| Mathematics 3 | EN3900 | Version | 4 |
| Reference | August 2021 | SCQF Level | SCQF 9 |
| Created | June 2002 | SCQF Points | 15 |
| Approved | August 2021 | ECTS Points | 7.5 |
| Amended |  |  |  |

## Aims of Module

To provide the student with the ability to apply advanced mathematics techniques to applied problems in engineering.

## Learning Outcomes for Module

On completion of this module, students are expected to be able to:
Calculate matrix eigenvalues and eigenvectors by hand or by computer as appropriate and apply eigen-methods to the solution of problems in engineering.
2 Derive and apply solutions of partial differential equations by separation of variables and Fourier series.
3 Derive and apply solutions of partial differential equations by finite difference methods.
4
Perform calculations using the vector differential operators grad, div and curl and apply these to problems in engineering.
5 Use computational packages in support of the other Learning Outcomes.

## Indicative Module Content

Eigenvalues and eigenvectors of matrices and their relation to second order systems including degenerate systems. Development and solution of differential equations using eigen-methods. Partial differential equations using separation of variables and Fourier series to include heat flow in one dimension, one-dimensional vibration and Laplaces equation. Finite difference methods to solve PDEs. Div, grad and curl and their identities.
Application of the vector operators to problems in Science and Technology.

## Module Delivery

The module is delivered using a series of lectures with associated tutorials and computer laboratories where techniques can be applied.

| Indicative Student Workload | Full Time | Part Time |
| :--- | :--- | :--- |
| Contact Hours | 48 | N/A |
| Non-Contact Hours | 102 | N/A |
| Placement/Work-Based Learning Experience [Notional] Hours | N/A | N/A |
| TOTAL | 150 | N/A |
| Actual Placement hours for professional, statutory or regulatory body |  |  |

## ASSESSMENT PLAN

If a major/minor model is used and box is ticked, \% weightings below are indicative only.

## Component 1

Type: Practical Exam Weighting: 30\% Outcomes Assessed: 5
Description: Computer based laboratory test.
Component 2
Type: Examination Weighting: 70\% Outcomes Assessed: 1, 2, 3, 4
Description: Closed book examination.

## MODULE PERFORMANCE DESCRIPTOR

## Explanatory Text

The module has 2 components and to gain an overall pass a minimum D grade must be achieved in each component. The component weighting is as follows: C 1 is worth $30 \%$ and C 2 is worth $70 \%$.
Practical Exam:

|  |  | A | B | C | D | E | F | NS |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | A | A | B | B | E | E |  |
|  | B | B | B | B | C | E | E |  |

## Module Requirements

Prerequisites for Module
Corequisites for module
Precluded Modules

EN2901 Mathematics 2 or equivalent.
None.
None.
