Module Title

MEng Individual Project

Reference	EN4604	Version	5
Created	March 2017	SCQF Level	SCQF 10
Approved	March 2004	SCQF Points	30
Amended	August 2017	ECTS Points	15

Aims of Module

To provide the student with the ability to undertake a major individual engineering research project and to report the findings of the work.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Plan and manage a major technical engineering research project.
- 2 Produce appropriate project specification, management and review documentation; maintain a logbook.
- 3 Conduct a focussed literature search and review.
- 4 Undertake a major investigative task, using initiative, imagination and creativity; carry out detailed and comprehensive critical analysis of the outcomes.
- 5 Produce a well-structured final project report, incorporating and justifying all aspects of the project work and defend the work in an oral presentation.

Indicative Module Content

There is no formal syllabus for this module. The project should have research and development-related objectives to deliver a useful outcome relevant to a placement company, a research group or other equivalent scholarly activity. The scope of work must include both technical and non-technical aspects appropriate to the requirements of these stakeholders and the level of course. The final report should display clear evidence of transferrable skills.

Module Delivery

The project is student-centred. Each student is allocated a member of academic staff who acts as the project supervisor. Students are expected to plan their own project activities and meet with their academic supervisor on a regular basis. Evidence of such meetings should be in the form of signed log book entries.
