## MODULE DESCRIPTOR

### Module Title

Advanced Well Engineering

Reference	ENM212	Version	7
Created	August 2021	SCQF Level	SCQF 11
Approved	April 2006	SCQF Points	15
Amended	August 2021	ECTS Points	7.5

### Aims of Module

This module focuses on the application of engineering practices to optimise and deliver enhanced productivity.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Design a feasible effective strategy for optimising a mature asset using and justifying appropriate advanced drilling technologies, demonstrating awareness of novel researched technologies.
- 2 Analyse, apply and implement a range of intervention techniques and well monitoring technologies to optimise well uptime.
- 3 Demonstrate awareness and construct an example of QRA based well programming.
- 4 Produce a conceptual design for a deepwater well demonstrating awareness of deep water drilling considerations and challenges.

### Indicative Module Content

1. High Pressure / High Temperature wells Techniques and Equipment 2. Deepwater Techniques and considerations 3. Underbalanced and TTRD Theory and practice 4 Extended Reach, Multilateral and Designer Design considerations Technology 5. Workover, Intervention and Well Management Techniques Productivity Issues Technology 6. QRA based well programming 7. Advanced Wells Drilling Equipment Completion Equipment Intelligent Wells Material Selection

### Module Delivery

The module is presented through lectures, guest speakers from industry, case work and student centred learning.

**Indicative Student Workload**

	Full Time	Part Time
Contact Hours	40	30
Non-Contact Hours	110	120
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	150
<i>Actual Placement hours for professional, statutory or regulatory body</i>		

**ASSESSMENT PLAN**

If a major/minor model is used and box is ticked, % weightings below are indicative only.

**Component 1**

Type:	Coursework	Weighting:	100%	Outcomes Assessed:	1, 2, 3, 4
Description:	Report and presentation.				

**MODULE PERFORMANCE DESCRIPTOR****Explanatory Text**

Component 1 comprises 100% of the module grade. To pass the module, a D grade is required.

Module Grade	Minimum Requirements to achieve Module Grade:
<b>A</b>	A
<b>B</b>	B
<b>C</b>	C
<b>D</b>	D
<b>E</b>	E
<b>F</b>	F
<b>NS</b>	Non-submission of work by published deadline or non-attendance for examination

**Module Requirements**

Prerequisites for Module	Normally a UK 2.2 honours degree or above, in Engineering or a related discipline. Proficiency in English language for academic purposes, or IELTS score of 6.5 or above. Qualification through previous relevant industry experience may be considered.
Corequisites for module	None.
Precluded Modules	This module is not suitable for students following an MSc in Professional Studies programme unless they meet the entry qualifications stipulated in the University Regulations on admission and the prerequisites above.
