

MODULE DESCRIPTOR

Module Title

Determination of Maintenance and Inspection Requirements for Asset Integrity Management

Reference	ENM310	Version	7
Created	August 2021	SCQF Level	SCQF 11
Approved	March 2015	SCQF Points	15
Amended	August 2021	ECTS Points	7.5

Aims of Module

Enable the student to identify, justify and apply the methodologies and techniques that are used to prioritise and determine maintenance and inspection requirements for the provision of Asset Integrity.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Critically evaluate Asset Integrity and Reliability Management, and Inspection practises and techniques.
- 2 Identify, define and critically review maintenance and inspection strategies.
- 3 Perform optimisation of an asset maintenance and inspection strategy using appropriate methodologies, and relevant records and data.

Indicative Module Content

Data and Information Systems: - Data collection and analysis to support optimisation of equipment maintenance/inspection strategy and equipment integrity. - Asset Performance Management Software Reliability and Integrity: - Identification and Quantification of Risk - Reliability Methodologies: RCM, TPM, FMEA and RCA - Reliability and Integrity Metrics and KPIs - Statistics and Statistical methods for Reliability including Weibull Analysis. Inspection: - Generic business processes of Inspection - Risk Based Inspection - Condition Monitoring techniques and application - Online monitoring - Instrumented System Inspection, SIL Levels Maintenance: - Development of Maintenance Strategy - Financial optimisation of maintenance tasks

Module Delivery

DISTANCE LEARNING: The module is delivered by online lectures, interactive forum discussions and directed self-study.

Indicative Student Workload

	Full Time	Part Time
Contact Hours	N/A	23
Non-Contact Hours	N/A	127
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	N/A	150
Actual Placement hours for professional, statutory or regulatory body		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type:	Coursework	Weighting:	50%	Outcomes Assessed:	3
Description:	Report based on a case study.				

Component 2

Type:	Examination	Weighting:	50%	Outcomes Assessed:	1, 2
Description:	Closed book examination.				

MODULE PERFORMANCE DESCRIPTOR**Explanatory Text**

The module has 2 components and an overall grade D is required to pass the module. The component weighting is as follows: C1 is worth 50% and C2 is worth 50%.

		Examination:						
		A	B	C	D	E	F	NS
Coursework:	A	A	A	B	B	C	E	
	B	A	B	B	C	C	E	
	C	B	B	C	C	D	E	
	D	B	C	C	D	D	E	
	E	C	C	D	D	E	E	
	F	E	E	E	E	E	F	
NS		Non-submission of work by published deadline or non-attendance for examination						

Module Requirements

Prerequisites for Module	Normally a UK honours degree, or equivalent, in Engineering or related discipline at class 2.2 or above and proficiency in English language for academic purposes (IELTS minimum score of 6.5 or equivalent).
Corequisites for module	None.
Precluded Modules	None.
