The latest version of this module is available here

#### **MODULE DESCRIPTOR**

#### **Module Title**

Delivery of Maintenance and Inspection for Asset Integrity Management

Reference	ENM311	Version	5
Created	February 2018	SCQF Level	SCQF 11
Approved	March 2015	SCQF Points	15
Amended	June 2020	ECTS Points	7.5

#### **Aims of Module**

Enable the student to identify, justify and apply the techniques that are used to ensure quality of maintenance task delivery, and to optimise the overall effeciency of Maintenance and Turnaround activities

#### **Learning Outcomes for Module**

On completion of this module, students are expected to be able to:

- 1 Critically evaluate maintenance management practices, and develop benchmarking, KPIs and other metrics to derive performance improvement.
- 2 Identify optimal maintenance task delivery factoring in planning techniques, turnarounds and contractors.
- Critically review management controls needed for plant integrity protection establishing details of maintenance processes to ensure an effective maintenance process is developed.

#### **Indicative Module Content**

Data and Information Systems: - Data collection and analysis to support Optimisation Maintenance task delivery - Computerised Maintenance Management Software Maintenance: - Development of Maintenance Strategy - Development of Spare parts requirements - Maintenance Planning - Use and Management of Maintenance Turnarounds - Insourcing and Outsourcing of Maintenance activities - Use of Contractors and Contract styles - Financial Optimisation of Maintenance activities Quality Assurance: - QA of Maintenance tasks - Technician Competence

### **Module Delivery**

DISTANCE LEARNING: The module is delivered by online lectures, interactive group work, case study tutorials and directed self-study.

Module Ref: ENM311 v5

Indicative Student Workload	Full Time	Part Time
Contact Hours	N/A	23
Non-Contact Hours	N/A	127
Placement/Work-Based Learning Experience [Notional] Hours		N/A
TOTAL	N/A	150
Actual Placement hours for professional, statutory or regulatory body		

#### **ASSESSMENT PLAN**

If a major/minor model is used and box is ticked, % weightings below are indicative only.

## **Component 1**

Weighting: 50% Outcomes Assessed: Type: Coursework 3

The coursework consists of a written report on a case study for the development and application Description:

of best practice in maintenance task delivery.

#### Component 2

50% Type: Examination Weighting: Outcomes Assessed: 1, 2

Description: Exam? closed book.

#### MODULE PERFORMANCE DESCRIPTOR

#### **Explanatory Text**

In order to pass the module, students should achieve a mark of at least 40% in each component (which has a weighting of 30% or more) and an overall grade of D or greater.

Module Grade	Minimum Requirements to achieve Module Grade:	
Α	Greater than or equal to 70%	
В	In the range 60% to 69%	
С	In the range 55% to 59%	
D	In the range 50% to 54%	
E	In the range 40% to 49%	
F	Less than 40%	
NS	Non-submission of work by published deadline or non-attendance for examination	

### **Module Requirements**

Normally a UK honours degree, or equivalent, in Engineering or related discipline at Prerequisites for Module class 2.2 or above and proficiency in English language for academic purposes

(IELTS minimum score of 6.5 or equivalent).

Corequisites for module None.

**Precluded Modules** None.
