

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

1. Critically analyse the impact of community development on population health and wellbeing.
2. Discuss the range of skills and approaches which can be used when working with populations.
3. Identify the assessment and application of assets for community wellbeing and measurement of outcomes.
4. Examine health issues that affect distinct population groups.
5. Critically evaluate the quality of evidence in the area under review to develop and support a justified research question.

Indicative Module Content

Asset based approaches, community development; approaches to working with communities; community involvement; social capital; inequalities; empowerment; social inclusion; capacity building; advocacy; participatory engagement methods; commissioning; wellbeing; work based health; co-production.
