## MODULE DESCRIPTOR

### Module Title

Supporting Workplace Health And Wellness: Enhancing Professional Practice

Reference	HSM168	Version	2
Created	May 2017	SCQF Level	SCQF 11
Approved		SCQF Points	30
Amended	September 2017	ECTS Points	15

### Aims of Module

The student will have the opportunity to explore and analyse the influence of work, including the work environment, on health from multiple perspectives.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Critically explore the current political, social and professional drivers and principles in relation to workplace wellness and health.
- 2 Analyse the health benefits of work and the influence of the work environment in the context of health, well-being and productivity.
- 3 Critically examine the roles and perspectives of key stakeholders in facilitating effective interagency collaboration to prevent/minimise health related work absence and promote sustained safe return to work.
- 4 Critically evaluate strategies and processes to promote sustained and productive healthy work practices.

### Indicative Module Content

Current policy drivers and legislation related to absence management, theoretical and cultural perspectives, partnerships, return to work, absence management, health improvement, health promotion, risk management, prevention, behaviour change, motivation, common work-related health conditions, case management, job analysis, ergonomic analysis, functional capacity evaluation, rehabilitation, workplace adjustment, work hardening, functional capacity evaluation, psychosocial factors, evidenced based practice, ethical issues.
