Aims of Module

The module aims to provide an overview of the legal framework for the regulation of information flows and the technology which facilitates them. It does so by setting out the context for information as a commodity in the modern world and the various legislative and common law rules which govern its use. In particular, it seeks to move beyond the text of these rules to understand how these are applied and used in practice.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Develop an understanding of the nature and importance of data and information within an IT-evolving world, including the risks which are faced and the need for data-security.
- 2 Understand and analyse the framework of legal rights and obligations which - both at national and international level govern data generation, management and transmission.
- 3 Demonstrate a critical awareness of, and the ability to evaluate legal and regulatory actions taken in response to the failure to protect data and ensure confidentiality, including the management of technology based risk.
- 4 Understand and evaluate how the issues noted above will changes as the technology develops.
