Created	June 2023	SCQF Level	SCQF 10
Approved	June 2017	SCQF Points	15
Amended	August 2023	ECTS Points	7.5

### Aims of Module

To allow students to critically appraise the core principles of biomedical ethics that underpin decision making in biomedicine, medicine, and the legal regulation of these issues.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Critically appraise the ethical principles underlying and justifying actions, and evaluate how these principles underlie scientific, medical and legal decision-making.
- 2 Demonstrate analysis of different approaches taken in selected foreign jurisdictions.
- 3 Critically evaluate moral objections and competing ethical arguments.

### Indicative Module Content

The student will study the underpinning principles, alongside various aspects of biomedicine and medicine which are subjected to legal regulation including: abortion, pre-natal screening and claims of 'wrongful life'; use of genetic information and privacy issues; organ donation and transplantation; non-treatment of the newborn; persistent vegetative state; 'do not resuscitate' orders and living wills; active and passive euthanasia; ethical issues in research and experimentation; ownership of living and dead tissues and cadavers.

### Module Delivery

This is a lecture and seminar based module. Lectures provide core module content. Seminars develop associated higher level skills through student centred learning.
