mental health care and support in the context of emerging integrative and collaborative practices.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

1. Critically appraise the effectiveness of acute mental health care and support with reference to stakeholder perspectives.
2. Critically analyse the impact of culture within acute mental health care and support environments.
3. Critically evaluate the evidence-base of relevant acute mental health care and support interventions and practices.
4. Synthesise collaborative and innovative practices that empower individuals who experience acute mental health care and support and/or their families and
