

MODULE DESCRIPTOR

Module Title

Minor Injuries Management

Reference	NUM086	Version	3
Created	September 2020	SCQF Level	SCQF 11
Approved	October 2017	SCQF Points	15
Amended	November 2023	ECTS Points	7.5

Aims of Module

To prepare healthcare professionals to independently elicit a structured clinical history and perform a clinical minor injuries assessment concentrating on patients presenting with minor injuries.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Critically appraise professional and legal issues relating to the role of the healthcare professional managing minor injuries.
- 2 Evaluate the implications of the pathophysiological processes for patients presenting with minor injuries.
- 3 Critically appraise the skills required in consultation, history taking and assessment of patients presenting with minor injuries.
- 4 Critically analyse the decision-making processes involved in the diagnosis and treatment of minor injuries.
- 5 Synthesize the concepts of evidence-based practice that underpin the management of minor injuries through critical reflection.

Indicative Module Content

History taking and consultation; Assessment; Anatomy, physiology and pathophysiology relating to commonly presenting minor injuries; Triage, Simulated practice; Clinical reasoning; Decision making; Wound management; Radiography; Evidence based practice; Protocols; Professional and legal issues.

Module Delivery

This module will be delivered using a blend of teaching methods.
