

MODULE DESCRIPTOR

Module Title

Spectral Analysis and Interpretation

Reference	PL3606	Version	1
Created	October 2023	SCQF Level	SCQF 9
Approved	June 2002	SCQF Points	15
Amended	September 2023	ECTS Points	7.5

Aims of Module

To critically analyse IR, Raman, MS, and NMR spectra in structure elucidation.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Understand the techniques used in spectroscopic and spectrometric analysis of organic compounds.
- 2 Interpret IR, Raman, MS and NMR spectra in structure elucidation.
- 3 Discriminate between different drug/organic molecules using a combination of IR, Raman, MS and NMR spectra and perform data analysis from a range of advanced spectroscopic experiments.

Indicative Module Content

Topics include: Infrared, Raman, Nuclear Magnetic Resonance spectroscopy and Mass spectrometry in structure elucidation and the identification of drug/organic molecules IR and Raman Spectroscopy: The IR and Raman absorption process, sample preparation. The uses and interpretation of IR and Raman spectra. Mass Spectrometry: Theory of ionisation processes in the formation of molecular ions, mechanisms involved in base peak and other stable fragment ions, interpretation of mass spectra. NMR spectroscopy: nuclear spin states, magnetic moments, resonance absorption. ^1H NMR: chemical shift, integration, spin-spin coupling, $(n+1)$ rule, signal width and multiplicity, techniques to simplify complex spectra. ^{13}C NMR: fully and partially decoupled spectra. An introduction to advanced techniques, DEPT, COSY, HSQC, HMBC. Combined spectral interpretation of drug molecules, paint samples and polymers in forensic and chemical applications.

Module Delivery

This is a lecture based module supplemented by tutorials, practical laboratory classes and directed reading.

Indicative Student Workload	Full Time	Part Time
Contact Hours	40	N/A
Non-Contact Hours	110	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
Actual Placement hours for professional, statutory or regulatory body		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type:	Examination	Weighting:	100%	Outcomes Assessed:	1, 2, 3
Description:	Open book written examination.				

MODULE PERFORMANCE DESCRIPTOR

Explanatory Text

Component 1 (Examination) comprises 100%. A minimum of a Grade D is required to pass the module.

Module Grade	Minimum Requirements to achieve Module Grade:
A	A
B	B
C	C
D	D
E	E
F	F
NS	Non-submission of work by published deadline or non-attendance for examination

Module Requirements

Prerequisites for Module	Successful completion of Stage 2 Forensic and Analytical Science or equivalent.
Corequisites for module	None.
Precluded Modules	None.
