Approved	March 2023	SCQF Points	60
Amended	June 2022	ECTS Points	30

Aims of Module

To enable the student to critically evaluate appropriate scientific techniques, generate data in the course of autonomous research and articulate the results in a competent and appropriate manner.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Critically evaluate data and results from an extended independent programme of laboratory based research.
- 2 Produce a scientific paper including conclusions based on relevant theory and other published work in the field.
- 3 Take responsibility for the conclusions through appropriate defence presentation.

Indicative Module Content

The project plan was developed as part of module PLM307 Project Preparation (MSc) and applied within module PLM308 MSc Project. The work is an extended period in a laboratory carrying out appropriate research on the given topic. The research will be presented as a scientific paper and defended.

Module Delivery

The practical work will be carried out in an appropriate laboratory. Meetings with allocated supervisory staff will be no less than once per week. Laboratory work will be supported by designated laboratory staff.
