MODULE DESCRIPTOR

Module Title

Building Pathology 1

Reference	SU2036	Version	5
Created	April 2020	SCQF Level	SCQF 8
Approved	August 2009	SCQF Points	15
Amended	August 2021	ECTS Points	7.5

Aims of Module

This module will provide the student with the ability to critically analyse and diagnose the mechanisms of decay and deterioration of the building envelope and to devise interventions strategies with a view to prolonging the life of a building.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Recognise through inspection, the mechanisms of decay of the building envelope.
- 2 Provide diagnosis and prognosis of defects encountered within the building envelope.
- 3 Develop intervention strategies.

Indicative Module Content

This module is concerned with the continued use of existing buildings. In light of the importance of climate change, the maintenance, conservation and repair of buildings is essential for sustaining the built environment. The student will be encouraged to study the process of inspection, diagnosis and prognosis of building fabric defects and prepare a number of repair strategies for roof coverings, timber decay, wall fabric and associated window and door openings. The student will be encouraged to investigate sustainable repair strategies where applicable. Some collaborative work with other courses will form part of this module. This module will also explore how the deterioration of the different elements of the building envelope are interconnected and often lead to progressional failure. The module will investigate different levels of intervention strategies and how they are influenced by Client restrictions as well as the building's functional, performance, user and statutory requirements.

Module Delivery

This module will be delivered by a full range of learning and teaching techniques in the context of professional practice requirements.

Indicative Student Workload

	Full Time	Part Time
Contact Hours	35	N/A
Non-Contact Hours	115	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
<i>Actual Placement hours for professional, statutory or regulatory body</i>		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type:	Coursework	Weighting:	100%	Outcomes Assessed:	1, 2, 3
Description:	One individual assessment in the form of a report.				

MODULE PERFORMANCE DESCRIPTOR**Explanatory Text**

In order to pass the module students must achieve 40% or greater.

Module Grade	Minimum Requirements to achieve Module Grade:
A	70% or better
B	60% or better
C	50% or better
D	40% or better
E	35% or better
F	Less than 35%
NS	Non-submission of work by published deadline or non-attendance for examination

Module Requirements

Prerequisites for Module	None.
Corequisites for module	None.
Precluded Modules	SU2006 Procurement for the Built Environment 1

ADDITIONAL NOTES

Where appropriate, mixed discipline team working will be encouraged.
