## MODULE DESCRIPTOR

### Module Title

Integrative Studies 2 - Construction Management

Reference	SU2038	Version	3
Created	June 2017	SCQF Level	SCQF 8
Approved	September 2014	SCQF Points	30
Amended	September 2017	ECTS Points	15

### Aims of Module

To provide the student with the ability to integrate and consolidate knowledge and understanding from studies conducted throughout Stages 1 and 2.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Plan and programme the resources required to successfully complete the construction of a simulated project.
- 2 Identify the health, safety and environmental issues involved in the construction of a simulated project.
- 3 Appreciate the factors which influence time, cost and quality on a simulated project.
- 4 Apply knowledge of appropriate construction technology within the context of the project

### Indicative Module Content

The module facilitates the integration of topics delivered at Stages 1 and 2 by guided application of best practice techniques to a simulated simple building project. Organisational and economic factors will be viewed in the context of flexible and efficient construction practices. Design and construction will be integrated with emphasis on a safe, environmentally aware practical application and clear customer focus. Individual and team working activities will be encouraged.

### Module Delivery

This is a workshop based module supplemented by lectures. A substantial part of the module is devoted to student centred learning in the form of directed reading.
