MODULE DESCRIPTOR

Module Title

Integrative Studies 2 - Construction Management

Reference	SU2038	Version	3
Created	June 2017	SCQF Level	SCQF 8
Approved	September 2014	SCQF Points	30
Amended	September 2017	ECTS Points	15

Aims of Module

To provide the student with the ability to integrate and consolidate knowledge and understanding from studies conducted throughout Stages 1 and 2.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Plan and programme the resources required to successfully complete the construction of a simulated project.
- 2 Identify the health, safety and environmental issues involved in the construction of a simulated project.
- 3 Appreciate the factors which influence time, cost and quality on a simulated project.
- 4 Apply knowledge of appropriate construction technology within the context of the project

Indicative Module Content

The module facilitates the integration of topics delivered at Stages 1 and 2 by guided application of best practice techniques to a simulated simple building project. Organisational and economic factors will be viewed in the context of flexible and efficient construction practices. Design and construction will be integrated with emphasis on a safe, environmentally aware practical application and clear customer focus. Individual and team working activities will be encouraged.

Module Delivery

This is a workshop based module supplemented by lectures. A substantial part of the module is devoted to student centred learning in the form of directed reading.
