

MODULE DESCRIPTOR

Module Title

Sustainable Construction Practice

Reference	SU2065	Version	2
Created	July 2021	SCQF Level	SCQF 8
Approved	October 2020	SCQF Points	15
Amended	September 2021	ECTS Points	7.5

Aims of Module

To introduce the student to the concepts and value of sustainable practice in construction/ infrastructure and to understand how this can be influenced by built environment professionals.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Identify and explain concepts of sustainable practice within the built environment
- 2 Critically appraise the effect of sustainable practice on constructed environment policy, procurement and supply chains
- 3 Evaluate the influence and impact of emerging technologies and principles on sustainable practice

Indicative Module Content

Value of sustainable practice in the built environment; Cost and value of sustainable practice; Sustainable procurement; Efficient construction practice; Embedding sustainability in decision making; Tracking sustainability in the supply chain; ISO 20400 sustainable procurement; Supply chain transparency; Creating value through sustainability; Using technology to improve sustainable practice; Certification of sustainable practice UN sustainable development agenda; Corporate social responsibility; Sustainable value management

Module Delivery

This module will be delivered via a blend of lectures, workshops and tutorials. Where appropriate, practicing practitioners will assist with the delivery of teaching.

Indicative Student Workload

	Full Time	Part Time
Contact Hours	30	N/A
Non-Contact Hours	120	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
<i>Actual Placement hours for professional, statutory or regulatory body</i>		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type: Coursework Weighting: 100% Outcomes Assessed: 1, 2, 3

Description: This module will be assessed via one piece of project work that includes an element of collaborative team working.

MODULE PERFORMANCE DESCRIPTOR**Explanatory Text**

The overall module grade is based on 100% weighting of Component 1 (Project Work). An overall minimum grade D is required to pass the module. Non-submission will result in an NS grade.

Module Grade	Minimum Requirements to achieve Module Grade:
A	A
B	B
C	C
D	D
E	E
F	F
NS	Non-submission of work by published deadline or non-attendance for examination

Module Requirements

Prerequisites for Module	None.
Corequisites for module	None.
Precluded Modules	None.
