

MODULE DESCRIPTOR

Module Title

Fundamental Blood Sciences

Reference AS3501 Version 2 Created April 2020 SCQF Level SCQF 9 February 2018 SCQF Points Approved 15 Amended October 2021 **ECTS Points** 7.5

Aims of Module

To provide students with the ability to apply the principles of clinical biochemistry, haematology and the essential features of transfusion science to the diagnosis, treatment and monitoring of disease.

Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- Discuss the methods used for investigations of haempoiesis and haemostasis, incorporating appropriate management systems.
- Discuss preparation, storage and appropriate use of blood components, demonstrating knowledge of genetics, inheritance, structure and role of red cell antigens.
- Discuss the laboratory investigations of cardiovascular, gastrointestinal, renal, and liver disorders, and how pregnancy can be confirmed and monitored.
- 4 Evaluate results from the analysis of blood.

Indicative Module Content

Haematology: Haemopoiesis and haemostasis, basic morphology. Transfusion Science: Main blood group systems, effective blood bank practice and component preparation. Clinical Biochemistry: Clinical Endocrinology; thyroid function tests. Clinical chemistry of the kidney and related disorders; role of kidney in homeostasis of nitrogen, renal function tests, creatinine, gout and aminoaciduria's. Cardiovascular disease; platelet functions, thromboses and atherosclerosis. Liver disease; liver function tests, jaundice. Gastroenterology; gastric and duodenal function tests. Clinical chemistry of pregnancy and lactation; pregnancy tests. Analytical Techniques: Sample selection and quality assurance, manual and automated methods of investigations; cell identification and counting, haemoglobinometry, haematinic and haemoglobin variants, coagulation tests, serological techniques and compatibility testing.

Module Ref: AS3501 v2

Module Delivery

This is a lecture and case study oriented course supplemented with directed reading, seminars from visiting speakers and tutorial sessions.

Indicative Student Workload	Full Time	Part Time
Contact Hours	30	N/A
Non-Contact Hours	120	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
Actual Placement hours for professional, statutory or regulatory body		

ASSESSMENT PLAN

If a major/minor model is used and box is ticked, % weightings below are indicative only.

Component 1

Type: Examination Weighting: 70% Outcomes Assessed: 1, 2, 3

Description:

A closed book examination consisting of two sections: Section A will be one of three pre-seen

case studies; Section B will consist of essay questions.

Component 2

Type: Examination Weighting: 30% Outcomes Assessed: 4

Description: Unseen, 'spotter's test' examination.

MODULE PERFORMANCE DESCRIPTOR

Explanatory Text

The first grade represents Component 1 (EX1) weighted as major and the second, Component 2 (EX2), weighted as minor. A minimum of Module Grade D is required to pass the module, with compensation of grade E in Component 1 or Component 2 permitted. Non-submission of either component will result in an NS grade.

Madula Crada	Minimum Deguiremente te cebiava Madula Crade
Module Grade	Minimum Requirements to achieve Module Grade:
Α	AA, AB
В	AC, AD, AE, BA, BB, BC, CA
С	BD, BE, CB, CC, CD, DA, DB
D	CE, DC, DD, DE, EA, EB, EC
E	AF, BF, CF, DF, ED, EE, EF, FA, FB, FC, FD
F	FE, FF
NS	Non-submission of work by published deadline or non-attendance for examination

Module Requirements

Prerequisites for Module Successful completion of Stage 2 of the course, or equivalent.

Corequisites for module None.

Precluded Modules None.
