The latest version of this module is available [here](#)

## MODULE DESCRIPTOR

### Module Title

Introduction to Programming

Reference	CM1112	Version	1
Created	September 2020	SCQF Level	SCQF 7
Approved	March 2021	SCQF Points	15
Amended		ECTS Points	7.5

### Aims of Module

To provide students with the competencies needed to design and develop simple computer programs.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Demonstrate a practical knowledge of the basic programming structures of sequence, selection and iteration when implementing solutions to a computational problem.
- 2 Demonstrate a structured approach to the design, development and testing of solutions to programming problems.
- 3 Apply appropriate, effective algorithms and simple data structures in the solution of a programming exercise.
- 4 Make use of appropriate software tools to create effective solutions to programming problems.

### Indicative Module Content

Software Development: Variable, data types, declarations and expressions, iterative and conditional programming constructs, functions/methods, parameter passing mechanisms and arrays. Programming simple algorithms including max, min. Tracing programs. Strategies for testing. Documentation and software management

### Module Delivery

Key concepts on design and development practices are introduced through the lectures. The main emphasis of the course will be focused on the lab sessions. The lab sessions will create a flexible teaching session where individual lab assignments will be interspersed with demonstrations of current techniques and practices. This combination will allow students to develop an understanding of the theoretical underpinning of modern programming structures, whilst promoting development of proficiency in the practical application of software development.

**Indicative Student Workload**

	Full Time	Part Time
Contact Hours	42	N/A
Non-Contact Hours	108	N/A
Placement/Work-Based Learning Experience [Notional] Hours	N/A	N/A
TOTAL	150	N/A
<i>Actual Placement hours for professional, statutory or regulatory body</i>		

**ASSESSMENT PLAN**

If a major/minor model is used and box is ticked, % weightings below are indicative only.

**Component 1**

Type:	Practical Exam	Weighting:	100%	Outcomes Assessed:	1, 2, 3, 4
Description:	An assessed lab involving practical software development exercises.				

**MODULE PERFORMANCE DESCRIPTOR****Explanatory Text**

The calculation of the overall grade for this module is based on 100% weighing of C1. An overall minimum grade D is required to pass the module.

Module Grade	Minimum Requirements to achieve Module Grade:
<b>A</b>	The student needs to achieve an A in C1.
<b>B</b>	The student needs to achieve a B in C1.
<b>C</b>	The student needs to achieve a C in C1.
<b>D</b>	The student needs to achieve a D in C1.
<b>E</b>	The student needs to achieve an E in C1.
<b>F</b>	The student needs to achieve an F in C1.
<b>NS</b>	Non-submission of work by published deadline or non-attendance for examination

**Module Requirements**

Prerequisites for Module	None, in addition to course entry requirements.
Corequisites for module	None.
Precluded Modules	None.
