### Aims of Module

To provide the student with the fundamental principles of concept development, scriptwriting, storyboarding and animation. To develop 2D animation based on core fundamentals.

### Learning Outcomes for Module

On completion of this module, students are expected to be able to:

- 1 Select appropriate animation theories, processes and outcomes in the development of an animated product.
- 2 Research and develop an animation concept.
- 3 Identify key concepts in scriptwriting and storyboarding and implement them in the animation process.
- 4 Select and implement a range of appropriate fundamental animation techniques.
- 5 Critically evaluate and report on the development of an animated product.

### Indicative Module Content
